

Science Concepts is an engaging and comprehensive series that is the perfect multimedia supplement to traditional science instruction. The series makes extensive use of videos to bring key concepts to life plus interactive simulations that invite students to get their hands on key topics. The series also focuses on the vocabulary development and background information necessary to truly understand almost all of the topics found in your science curriculum. Student assessment and management plus an extensive teacher resource package and dynamic website complete this exciting series.

### Series Benefits

- Comprehensive coverage of key content in your science curriculum
- Extensive use of videos and animation to demonstrate concepts
- Lots of interactive activities, so students learn by doing
- Several levels of assessment to ensure complete understanding
- Complete teacher background resources packaged with extension activities
- Journal feature encourages students to write about science
- Links to a dynamic website that keeps the content updated

### Series Applications

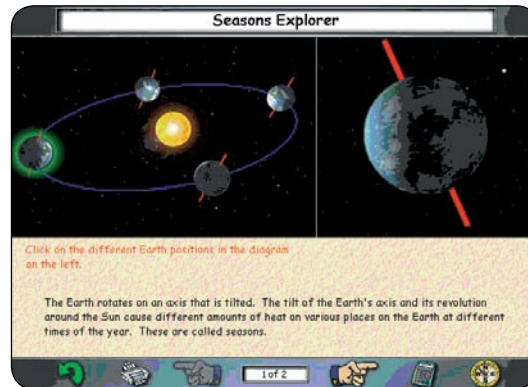

- The perfect multimedia supplement to science instruction
- Ideal for whole-class, small-group, or individual instruction

### Series Management

- Tracks students' mastery of key concepts and vocabulary

## EARTH SCIENCE CONCEPTS

Key Topics include:

- Weather
- Space
- Rocks
- Minerals
- Erosion

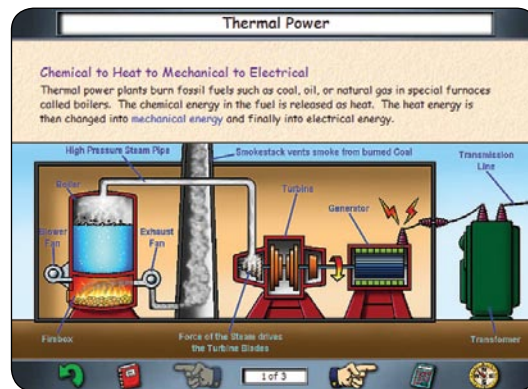

## LIFE SCIENCE CONCEPTS

Key Topics include:

- Habitats and communities
- Diversity of living things
- The human body

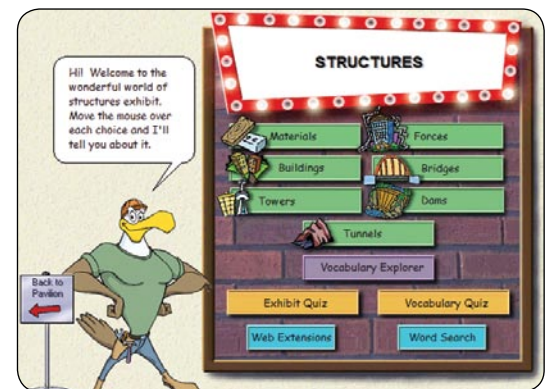

## PHYSICAL SCIENCE CONCEPTS: ENERGY

Key Topics include:

- Sound and light
- Electricity
- Conservation of energy
- Pulleys and gears
- Motion and forces
- Simple machines and mechanisms

## PHYSICAL SCIENCE CONCEPTS: MATTER

Key Topics include:

- Properties and changes in materials
- Structures
- Flight and the properties of air
